

# SPOKANE SPORT HORSE FARM LLC BEST PRACTICES

We have been a boarding, training, schooling and show facility for 30 years. We have always advocated for the care and well being of our own horses as well as those which live or attend functions here. We are happy to welcome you and your horse but recent circumstances make it necessary to clearly state the requirements to enter our private property.

LINKS AND NECESSARY FORMS ARE FOUND HERE AND ON THE FARM WEBSITE [SPOKANESPORTHORSE.COM](http://SPOKANESPORTHORSE.COM)

## SSHF WAIVER OF LIABILITY

This waiver must be signed by all who enter, riders and non-riders as well. Parents should list minor children on their form. Be Legible please!

## EHV EXPOSURE RELEASE

This waiver should be provided by the adult responsible for the horse. Confirms no known exposure or symptoms of EHV in the preceding 21 days.

## PROOF OF VACCINATION WITHIN 6 MONTHS FOR EHV

You may provide a copy from your veterinarian or you may document on the USEF form. This has been a long-standing USEF GR845 rule. You WILL NOT BE ALLOWED TO ENTER THE PROPERTY WITHOUT PROVIDING PROOF OF CURRENT VACCINATION.

## TEMPERATURE LOGS

Current veterinary practices suggest twice daily monitoring at least three days prior to entrance and during residence on facility grounds. We highly recommend you adhere to this policy. Currently we will not ask you to provide this log but do suggest you monitor your horse's temperature and record it. DO NOT bring a horse who has had a temp of 101.5 F or greater. If you are on grounds and your monitoring reveals a new temperature elevation to 101.5 F immediately contact farm owners and your show or clinic director. We will help quarantine that horse away from others.

## BIOSECURITY

Please enter only your assigned barn. Bring your own buckets and cleaning supplies and do not borrow equipment from the farm. Do not put hose end into your bucket. Try to sanitize hands between horses you handle and try not to share equipment.

These links and a tracking mechanism will become quickly live on our website and be shared as well with any clinic or show that wishes to use this facility. We can attempt by adhering to these stringent best practices to reduce risks for all who attend.
